HAIR CARE
ATTITUDE

biORGANIC

FOAM GEL

ACTION

Mousse Gel ideal for drying with a hairdryer, diffuser, curling iron and any heat source.

Gives shape, control, body and texture. It creates a wet effect with strong hold.

The particular texture is given by Polyquaternium-10 which, in addition to shaping the wave, creates a protective film on the hair, with a strong conditioning and restructuring action.

Formulation enriched with Honey extract and Willow extract, with moisturizing, emollient and polishing properties; they prevent dehydration and brittleness of the hair caused by any heat source. In addition, the Silk Proteins give softness and shine.

Sun protection with UV filter and anti-humidity properties.

HOW TO USE

Shake the bottle, turn upside down and dispense the desired amount of product on your hand or on a comb.

Apply to damp hair then proceed to desired styling.

PARABEN
FREE
