

## CHRØMIS

### CHRØMIS Toning Color - Trattamento Tonalizzante

**ILLUMINATING TONING TREATMENT in cream, formulated without ammonia, PPD, resorcinol, or parabens. Vegan formula.**

Ideal for natural, colored, or bleached hair, it delivers intense reflections and extraordinary shine. Designed for post-bleaching use, it works with precision to correct and neutralize unwanted yellow and orange tones, while preserving the purity and exceptional luminosity of the color

Thanks to its high pigment concentration, Chrømis ensures fast and effective performance. More than just a corrector, it is a true creative tool for professionals, enriched with Baobab Oil for its antioxidant properties and Mango Butter, which envelops the hair fiber with a protective and emollient film

**REFLECTION CUSTOMIZATION:** The shades in the chart can be mixed together or applied in sequence, with an intermediate rinse between applications, to create tailor-made reflections and exclusive tones.

For full control of intensity, the **BOOSTER 000** can be used in the amount determined by the professional, allowing the chromatic strength of the chosen shade to be adjusted according to the desired result.

**Technical note:** The final outcome is closely linked to the lightening level achieved during the bleaching phase.

#### HOW TO USE

In a non-metallic container, mix the Chromis toning cream with the **Chromis DEVELOPER Cream at 3.5 or 5 volumes**. Application is recommended at the shampoo station on damp hair, especially on mid-lengths, to ensure a uniform and balanced result.

The mixing ratio allows modulation of the final intensity:

- **MIX 1:3 with 5V Developer** to achieve a soft and delicate effect, ideal for light and natural toning.
- **MIX 1:1.5 to 1:2 with 5V or 3.5V Developer** to intensify the reflection for a deeper, more vivid color.
- **MIX 1:3 with BOOSTER 000 and 5V Developer** to achieve enhanced hair shine.

**PROCESSING TIME:** The processing time generally ranges from 5 to 15 minutes, depending on the starting color and the desired result. Constant visual monitoring during application is essential to manage the color precisely and achieve a balanced and harmonious toning.

**FINAL TREATMENT:** After the processing time has elapsed, rinse the hair with lukewarm water and use a gentle shampoo for treated hair (biOTHERAPY Treated Hair Shampoo and Treated Hair Treatment).

**Note:** The shades achieve the best results when applied to hair that has been lightened to the Starting Level.

**INGREDIENTS:** Aqua (Water), Cetearyl Alcohol, Cetearth-30, Propylene Glycol, Isodecyl Oleate, Sodium Lauryl Sulfate, Ethanolamine, Glyceryl Stearate, Paraffin, Toluene-2,5-Diamine Sulphate, Cetyl Palmitate, 2-Methylresorcinol, Parfum / Fragrance, Ascorbic Acid, Sodium Hydrosulfite, EDTA, 4-Chlororesorcinol, 4-Amino-2-Hydroxytoluene, 2-Methyl-5-Hydroxyethylaminophenol, N,N-Bis(2-Hydroxyethyl)-p-Phenylenediamine Sulfate, m-Aminophenol, Mangifera Indica Seed Butter, 2,4-Diaminophenoxyethanol HCl, 2-Amino-4-Hydroxyethylamino Anisole Sulfate, 1-Naphthol, 1-Hydroxyethyl 4,5-Diamino Pyrazole Sulphate, p-Aminophenol, Adansonia Digitata Seed Oil.

#### PACKAGING

Tube 100ml  
Code: MCH

#### ACTIVE INGREDIENTS

**MANGO BUTTER**  
Protective and moisturizing action with a brightening effect.  
It gives the hair softness, silkiness, and elasticity.

**BAOBAB OIL**  
Antioxidant, anti-aging action with deep nourishment and maximum shine.
